1 Microbial Biofilm, Applications, and Control
Editorial Overview

Aransiola S.A., Musa O.I., Babaniyi R.B., and Naga Raju Maddela

CONTENTS

1.1 Microbial Biofilm 4
1.1.1 An Outline of Biofilm 4
1.1.2 Structure of Biofilm 4
1.1.3 Polysaccharides 5
1.1.4 Protein Matrix 5
1.1.5 Extracellular DNA 5
1.2 Development/Formation – Mechanism 6
1.2.1 Microbial Attachment to the Surface 6
1.2.2 Microcolony Development 7
1.2.3 Maturation and Design 8
1.2.4 Detachment/Scattering of Biofilm 8
1.2.5 Mechanism in Biofilm Formation 9
1.3 Applications of Microbial Biofilms 10
1.3.1 Agricultural Applications 10
1.3.2 Wastewater Treatment 11
1.3.3 Bioremediation and Biodegradation 11
1.3.4 Medical Application of Biofilms 11
1.3.5 Microbial Biofilm in Chronic Infection Treatment 12
1.3.6 Modulation of Immune Response 12
1.3.7 Industries 12
1.4 Problems Associated with Microbial Biofilms 12
1.4.1 Biofilm Thickness 12
1.4.2 Pollutants Nature 13
1.4.3 Biocorrosion 13
1.4.4 Biofouling 13
1.4.5 Infection 13
1.5 Anti-Biofilm Strategies 14
1.6 About This Volume 16
1.7 Conclusions 17
References 17
